

AUPINS Z Series AC Charger

Product Introduction

The AUPINS Z series AC charger is an affordable, lightweight and portable high-performance single-phase/three-phase electric vehicle charging solution. It offers three power versions: 7kW, 11kW, and 22kW. Equipped with a red CEE three-phase industrial plug, it supports 380V three-phase power input, easily converting industrial power to household/automotive-grade charging power, eliminating the inconvenience of having industrial power but being unable to charge your vehicle.

Product Features

- Flexible Power Options:**
 Supports 7kW, 11kW, and 22kW charging capacities, adaptable to 16A/32A output, suitable for various power grids and electric vehicle types.
- Rugged and Durable:**
 Made with flame-retardant materials and an IP 54 protection rating, this sealed design is dustproof, waterproof, and impact-resistant, ensuring stable operation in outdoor campsites, open-air parking lots, and damp garages, adapting to various harsh environments.
- Safe and Compliant:**
 Built-in overcurrent, overvoltage, leakage, and overheat protection modules ensure safe charging throughout the process.
- Multiple Application Scenarios:**
 Suitable for residential, public, and commercial charging environments, with natural cooling and maintenance-free operation.

Technical performances

- Environment**
 Humidity: 5% to 95% no congeal
 Altitude height: 2000m
 Size: 19.5*14.4*10cm
 Input Voltage: AC 7kW/AC 11kW/AC 22kW
 Temperature: -30°C ~ 55°C
- Electrical**
 RCD: Type A + DC 6mA
 Input voltage: 1/N/PE ~ 230V 3/N/PE ~ 380V 3/N/PE ~ 380V
 Input frequency: 50Hz
 The max power: 7kW 11kW 22kW
 Electric relay specification 50A 250VA
 RCD: Type A + DC 6mA
 Input voltage: 1/N/PE ~ 230V 3/N/PE ~ 380V 3/N/PE ~ 380V
 Input frequency: 50Hz
